Denver President, John Thompson

Dear Members,

Is it me, or did January just fly by? It seems like only a few days ago that I was wishing you all a Happy New Year and trying to compose something interesting for the January Wigglebutt. I hope, at least, that your new year is going well so far.

It is February already, and the show committee is continuing to organize the specialty show. The premium list will come out soon, and the on-line entry will be launched for the 5th year. In reviewing the club's history, I found that the very first AKC sanctioned Bulldog Club of Denver Specialty Show occurred on February 5, 1950. This year will mark the 70th anniversary of our show. It is an exciting time, and the specialty show looks to be shaping up well.

How it all started...adventures on the dark side

by April Paulman

Recently there has been a bright light shown on Bulldogs doing performance. Rudy, the lightning-fast bulldog won hearts at the Westminster running agility in finals, and for weeks following the event people were asking about him. The Bulldog Club of America has embraced performance in a way it has never done before in the last few years by forming a Performance and Civic Activities Committee formed to promote performance activities by bulldogs. New programs have been introduced already by the committee to recognize bulldogs doing these activities throughout the year (Versatility Awards), as well as during nationals week (Most Versatile Bulldog Contest), and more are planned for the future. These awards not only recognize the individuals and dogs who compete in these activities, but also serve to illustrate that our breed is healthy and very capable of performing various functions.

The full article is the story of how one little bulldog changed my life and launched us into performance. I hope that it encourages the reader to give it a try....it just might change your life too. 😊

Fading Puppy Syndrome in Dogs

by Krista Williams, BSc, DVM: Ernest Ward, DVM

What is fading puppy syndrome?

Fading puppy syndrome is a term used to describe puppies that are apparently normal at birth but gradually fade and die within the first two weeks of life. Normal pre-weaning losses in dogs, including stillborn puppies, can be up to thirty percent (30%), with about half of these deaths occurring within the first week of life.

Jan's Dog Show Boost Survey

[Access the 25 Minute Survey Presentation Here](#)

This presentation is designed to be viewed by AKC clubs, committees, groups or individuals.

Jan's Dog Show Boost Survey was completed November 15, 2019 in memory of Jan Breitenfeldt and her daughter Skye. Jan and Skye were killed travelling home to Whitehall, MT in May 2019 from a conformation dog show. Her family, including husband Todd and daughter Sari, have committed to dedicating resources in Jan's name to increase participation in and enjoyment of showing dogs. In life, Jan was inspired to mentor many beginners and prevent the frustrations she and her family experienced as dog show rookies. Jan's Pekingese line is expected to continue under the expertise of her husband.
